Professional Development Opportunities

Number Skills & Mental Maths

A session focused on back to basics using student popular games that will empower your students with all kinds of strategies & mental maths techniques. Games will cover place value, rounding, decimals, graphing & all operations. Problem solving strategies are integrated into the games & can be adapted to suit the needs of all students. Get back to basics. Come prepared to play!

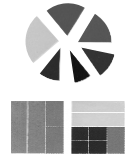

Probability, Chance & Statistics Games

Wondering how to teach probability? Odds are... you'll have fun learning probability concepts, patterns, problem solving, mental maths strategies, place value, graphing and more through maths games using regular and multi-sided dice. Classroom and resource management tips will also be provided. If you have multi-sided dice in the school and are wondering what to do with them then this is the session for you.

Fraction Games

Come play with unique fraction dice and fraction circles. Games to teach fraction names, comparing fractions, operations with fractions, equivalence, and more! Bring fraction concepts to life for your students in a meaningful hands-on way. We teach the concepts through play, which helps develop the understanding before the algorithms are introduced.

Spelling Games

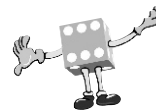

Play a selection of spelling and language games using our special 30 sided alphabet dice and letter tiles that stick and stack. Learn strategies for letter recognition, sound symbol relationships, spelling simple and complex words, puzzlers and more! This workshop will give teachers games to help motivate students to enjoy spelling lessons.

Maths Activity Days

This is a great way to promote Thinking Mathematically and building your school community with a fun educational incursion.

Students rotate through up to 6 hands on maths games, focusing on skills and number sense. This day caters for years P-7 in up to 4 groups of 120 students each participating for 1 hour.

Money Games

Kids love money and they love games. So it seemed natural to pair the Box Cars Maths Game format with the teaching of money concepts. Come prepared to play new card and dice games that teach money concepts, problem solving, probability and the operations. Whole class activities to teach real life connections will also be shared. Come prepared to play!

Student Model Lessons

Our consultant works with your students in the classroom. Three forty-five minute lessons can be run across the school to suit your needs. Consultants will work with any age groups selected to demonstrate how Box Cars will function with your students.

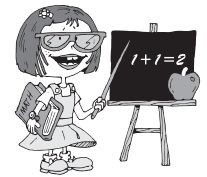

Combination Sessions

Incorporates the model student lessons and an after school P.D. for staff. This special package gives schools the best of both worlds with student lessons & motivational teacher P.D. at a discounted rate.

Family Maths Night

We will come and motivate, educate and entertain 50 of your students and parents in the fun of maths games. This evening can be a fundraiser for the school or simply a fun information evening to help students & parents alike to enjoy doing maths.

box cars™ products are proudly supplied by **Edsource Australia**
